## Tiny Dino Lily

**Tiny Dino Lily**  
*Lilium 'Tiny Dino'*

Height: 18 inches  
Spread: 12 inches  
Spacing: 10 inches  
Sunlight:

Hardiness Zone: 4a

Group/Class: Dwarf Asiatic

### Description:

This variety is a compact lily that bears well formed, upward facing, bright orange blooms; perfect for containers or massing along borders; they are also known to have multiple blooms per stem

### Ornamental Features

Tiny Dino Lily features bold orange trumpet-shaped flowers at the ends of the stems in early summer. The flowers are excellent for cutting. Its narrow leaves remain green in colour throughout the season. The fruit is not ornamentally significant.

### Landscape Attributes

Tiny Dino Lily is an herbaceous perennial with a rigidly upright and towering form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects
- Disease

Tiny Dino Lily is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use

## Tiny Dino Lily

---

### Planting & Growing

Tiny Dino Lily will grow to be about 15 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by multiplication of the underground bulbs; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
